## WELCOME & CONGRATULATIONS

Congratulations on your purchase of a new refrigerator! We here at **Electrolux Home Products, Inc.** are very proud of our product and we are completely committed to providing you with the best service possible. Your satisfaction is our #1 priority.

Please read this Use & Care Manual very carefully. It contains valuable information on how to properly maintain your new refrigerator.

We know you'll enjoy your new refrigerator and **Thank You** for choosing our product. We hope you consider us for future purchases.

### PLEASE READ AND SAVE THESE INSTRUCTIONS

This Use & Care Manual provides specific operating instructions for your model. Use your refrigerator only as instructed in this manual. These instructions are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating and maintaining any appliance.

Please record your model and serial numbers below for future reference. This information is found on the serial plate located inside the refrigerator compartment.

#### NOTE

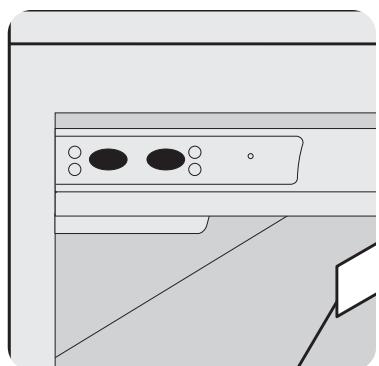

Use only soap and water to clean serial plate.

Model Number: \_\_\_\_\_

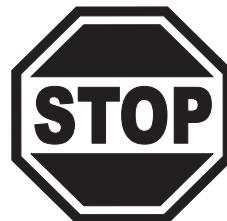

Serial Number: \_\_\_\_\_

## Got Questions? Need Parts or Service?

**Before Calling Your  
Local Repair Service -  
CALL:**

**Electrolux  
Solutions Hotline**

(United States)

**1-800-944-9044**

(Canada)

**1-800-668-4606**

- ✓ Resolve many service issues over the phone at your convenience!
- ✓ If we can't resolve your service issue, we'll schedule a reputable local service technician for you!
- ✓ Order genuine Electrolux Parts & Accessories
- ✓ Purchase Extended Warranty Protection

### Extend Your Warranty Protection With An *Extended Service Contract*

**CALL 1-800-944-9044 To Enjoy These Benefits:**

- **Total freedom from repair bills** so unexpected repairs won't upset your budget.
- **Fast, convenient toll-free service** is just a phone call away.
- **Top-quality repairs** by factory-trained experts.
- **Quick access to genuine replacement parts** so you can rest assured your refrigerator is repaired with the proper components.

## IMPORTANT SAFETY INSTRUCTIONS

### WARNING

Please Read All Instructions Before Using This Refrigerator.

#### FOR YOUR SAFETY

- Do not store or use gasoline, or other flammable liquids in the vicinity of this or any other appliance. Read product labels for warnings regarding flammability and other hazards.
- Do not operate the refrigerator in the presence of explosive fumes.
- Avoid contact with any moving parts of automatic ice maker.
- Remove all staples from the carton. Staples can cause severe cuts, and also destroy finishes if they come in contact with other appliances or furniture.

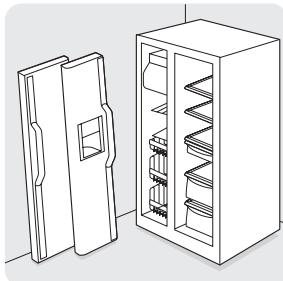

#### CHILD SAFETY

Destroy or recycle the carton, plastic bags, and any exterior wrapping material immediately after the refrigerator is unpacked. Children should **NEVER** use these items to play. Cartons covered with rugs, bedspreads, plastic sheets or stretch wrap may become airtight chambers, and can quickly cause suffocation.

#### PROPER DISPOSAL OF YOUR REFRIGERATOR OR FREEZER

##### *Risk of child entrapment*

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators or freezers are still dangerous – even if they will sit for “just a few days.” If you are getting rid of your old refrigerator or freezer, please follow the instructions below to help prevent accidents.

##### **Before you throw away your old refrigerator/ freezer:**

- Remove doors.
- Leave shelves in place so children may not easily climb inside.
- Have refrigerant removed by a qualified service technician.

### WARNING

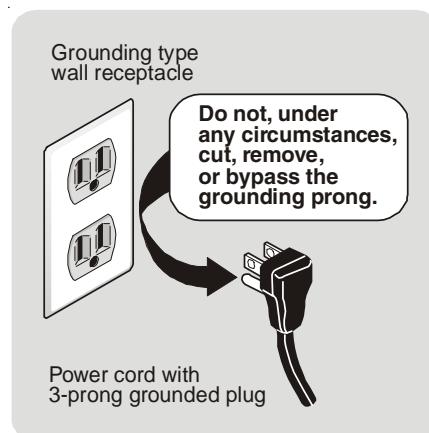

These Guidelines Must Be Followed To Ensure That Safety Mechanisms In This Refrigerator Will Operate Properly.

#### ELECTRICAL INFORMATION

- **The refrigerator must be plugged into its own dedicated 115 Volt, 60 Hz., 15 Amp, AC only electrical outlet.** The power cord of the appliance is equipped with a three-prong grounding plug for your protection against electrical shock hazards. It must be plugged directly into a properly grounded three prong receptacle. The receptacle must be installed in accordance with local codes and ordinances. Consult a qualified electrician. Avoid connecting refrigerator to a Ground Fault Interrupter (GFI) circuit. **Do not use an extension cord or adapter plug.**
- If the power cord is damaged, it should be replaced by an authorized service technician to prevent any risk.
- Never unplug the refrigerator by pulling on the power cord. Always grip the plug firmly, and pull straight out from the receptacle to prevent damaging the power cord.
- Unplug the refrigerator before cleaning and before replacing a light bulb to avoid electrical shock.
- Performance may be affected if the voltage varies by 10% or more. Operating the refrigerator with insufficient power can damage the compressor. Such damage is not covered under your warranty.
- Do not plug the unit into an electrical outlet controlled by a wall switch or pull cord to prevent the refrigerator from being turned off accidentally.

#### IMPORTANT

Pressing and holding the **On/Off** button for 3 seconds, located on the left side of the temperature control panel (Electronic controls), or turning the Freezer and Fresh Food controls to “0” (Mechanical controls) will disable your refrigerator’s cooling system, but does not disconnect the power to the light bulb and other electrical components. To turn off power to your refrigerator you must unplug the power cord from the electrical outlet.

## INSTALLATION

This Use & Care Manual provides general operating instructions for your model. Use the refrigerator only as instructed in this Use & Care Manual. **Before starting the refrigerator, follow these important first steps.**

### LOCATION

- Choose a place that is near a grounded electrical outlet. **Do Not** use an extension cord or an adapter plug.
- If possible, place the refrigerator out of direct sunlight and away from the range, dishwasher or other heat sources.
- The refrigerator must be installed on a floor that is level and strong enough to support a fully loaded refrigerator.
- Consider water supply availability for models equipped with an automatic ice maker.

### INSTALLATION

#### **! CAUTION**

**Do Not install the refrigerator where the temperature will drop below 55°F (13°C) or rise above 110°F (43°C). The compressor will not be able to maintain proper temperatures inside the refrigerator.**

**Do Not block the toe grille on the lower front of your refrigerator. Sufficient air circulation is essential for the proper operation of your refrigerator.**

#### **Installation Clearances**

- Allow the following clearances for ease of installation, proper air circulation, and plumbing and electrical connections:

Sides & Top ----- 3/8"  
Back ----- 1"

### DOOR OPENING

#### **NOTE**

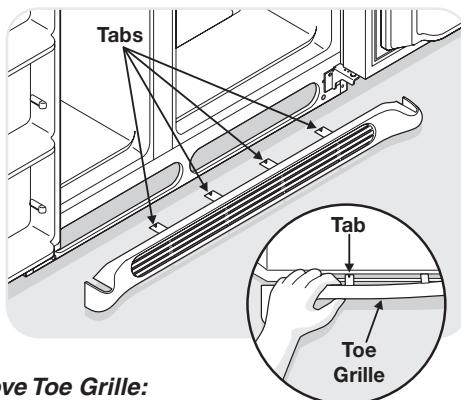

If your refrigerator is placed with the door hinge side against a wall, you may have to allow additional space so the door can be opened wider.

Your refrigerator should be positioned to allow easy access to a counter when removing food. For best use of drawers and freezer baskets, the refrigerator should be in a position where both the refrigerator and freezer doors can be fully opened.

### TOE GRILLE INSTALLATION / REMOVAL

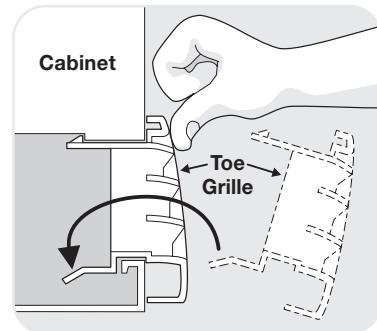

#### **To Install Toe Grille:**

- Open freezer and fresh food compartment doors.
- Line up toe grille at base of refrigerator, making sure the four bottom tabs are resting through holes at base of cabinet.
- Starting from left side of toe grille, press in on first top tab using your thumb and push toe grille forward until it snaps in place. Continue this process until all tabs are snapped in place and toe grille is secured to refrigerator.

#### **To Remove Toe Grille:**

- Open freezer and fresh food compartment doors.
- Working from left side of toe grille, slip your fingers between top of toe grille and cabinet. Gently pull forward until first set of tabs are free. Slide your hand down past the free tabs and pull forward again until the second set of tabs are free. Continue this process until all tabs are free and the toe grille can be removed. (See graphic at top of page in right column.)

### LEVELING

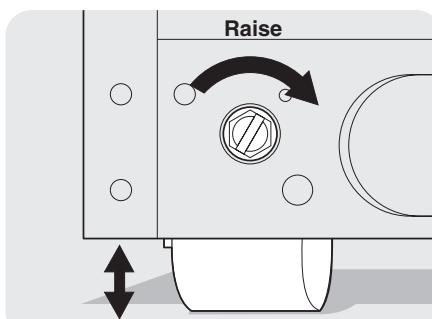

All four corners of your refrigerator must rest firmly on a solid floor. Your refrigerator is equipped with adjustable front rollers to help level your unit. To ensure proper door seal and assist door closing, the refrigerator should be tilted 1/4" (6 mm), front to back.

#### **To Level Your Refrigerator:**

- Remove toe grille. (See "To Remove Toe Grille".)
- Use flat-blade screwdriver or 3/8" socket wrench to adjust front rollers.

#### **NOTE**

The refrigerator doors are designed to shut by themselves within a 20 degree opening.

- Check both doors to be sure seals touch cabinet on all four sides.

## CONNECTING HOUSEHOLD WATER SUPPLY TO REFRIGERATOR

### **WARNING**

To avoid electric shock, which can cause death or severe personal injury, disconnect the refrigerator from electrical power before connecting a water supply line to the refrigerator.

### **CAUTION**

#### To Avoid Property Damage:

- Copper tubing is recommended for the water supply line. Water supply tubing made of  $\frac{1}{4}$ " plastic is not recommended since it greatly increases the potential for water leaks. Manufacturer will not be responsible for any damage if plastic tubing is used for supply line.**
- DO NOT install water supply tubing in areas where temperatures fall below freezing.**
- Chemicals from a malfunctioning softener can damage the ice maker. If the ice maker is connected to soft water, ensure that the softener is maintained and working properly.**

### **IMPORTANT**

Ensure that your water supply line connections comply with all local plumbing codes.

#### **Before Installing The Water Supply Line, You Will Need:**

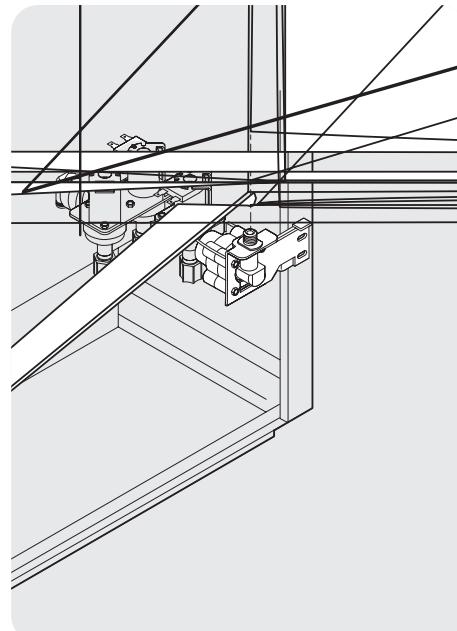

- Basic Tools:** adjustable wrench, flat-blade screwdriver, and Phillips™ screwdriver
- Access to a household cold water line with water pressure between 30 and 100 psi.
- A water supply line made of  $\frac{1}{4}$  inch (6.4 mm) OD, copper tubing. To determine the length of copper tubing needed, you will need to measure the distance from the ice maker inlet valve at the back of the refrigerator to your cold water pipe. Then add approximately 7 feet (2.1 meters), so the refrigerator can be moved out for cleaning (as shown).
- A shutoff valve to connect the water supply line to your household water system. **DO NOT** use a self-piercing type shutoff valve.
- A compression nut and ferrule (sleeve) for connecting the water supply line to the ice maker inlet valve.

### **NOTE**

Water line kit number 5303917950, available from your appliance dealer at additional cost, contains 25 feet (7.6 meters) of  $\frac{1}{4}$  inch OD copper tubing, a saddle type shutoff valve (nonpiercing), (2)  $\frac{1}{4}$  inch brass compression nuts, (2) ferrules/sleeves, and instructions for installing a water supply line.

#### **To Connect Water Supply Line To Ice Maker Inlet Valve**

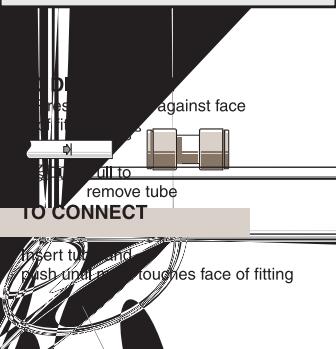

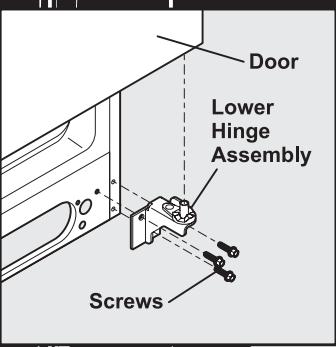

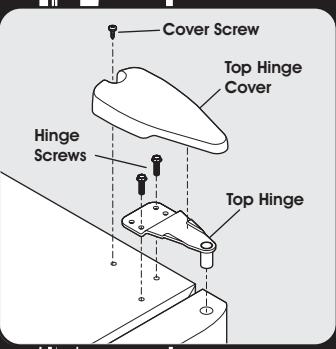

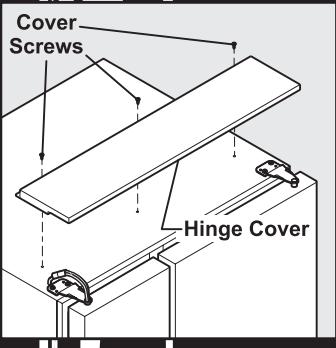

- Disconnect refrigerator from electric power source.
- Place end of water supply line into sink or bucket. Turn ON water supply and flush supply line until water is clear. Turn OFF water supply at shutoff valve.
- Unscrew plastic cap from water valve inlet and discard cap.
- Slide brass compression nut, then ferrule (sleeve) onto water supply line, as shown.
- Push water supply line into water valve inlet as far as it will go ( $\frac{1}{4}$  inch). Slide ferrule (sleeve) into valve inlet and finger tighten compression nut onto valve. Tighten another half turn with a wrench; **DO NOT** over tighten.
- With steel clamp and screw, secure water supply line to rear panel of refrigerator as shown.
- Coil excess water supply line (about  $2\frac{1}{2}$  turns) behind refrigerator as shown and arrange coils so they do not vibrate or wear against any other surface.
- Turn ON water supply at shutoff valve and tighten any connections that leak.
- Reconnect refrigerator to electrical power source.
- To turn ice maker on, lower wire signal arm (side mounted) or set the ice maker's On/Off power switch to the "I" position (rear mounted).

### **IMPORTANT**

After connecting the water supply, refer to "How to Prime the Water Supply System" for important information about priming an empty water supply system.

**Your refrigerator's water supply system includes several tubing lines, a water filter, a water valve and a water tank. To ensure that your water dispenser works properly, this system must be completely filled with water when your refrigerator is first connected to the household water supply line.**

**Before you start:**

- 1 Make sure the electrical power cord is unplugged from the wall outlet.
- 2 Remove any food from the door shelves.
- 3 Close the doors.

**To remove the hinge cover: (some models)**

- 1 Remove the three screws from the cover over the top door hinges.
- 2 Pull the cover forward about a half inch and lift it off.

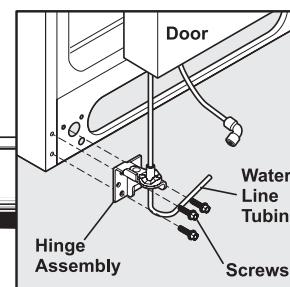

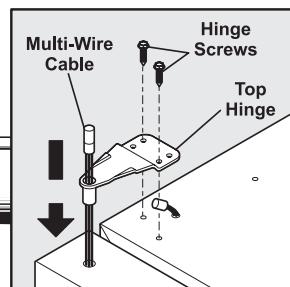

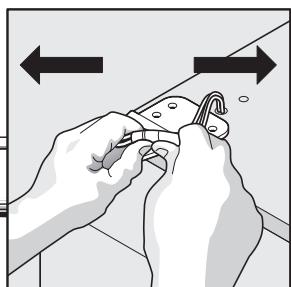

**To remove the refrigerator door:**

- 1 Remove top hinge cover screw on refrigerator door and remove cover. (some models)
- 2 Trace lightly around the door's top hinge with a pencil. This makes reinstallation easier.
- 3 Remove the two screws from the top hinge. Lift the door off of the bottom hinge and set it aside.
- 4 Remove the three bottom hinge screws and hinge, if necessary.

**To remove the freezer door:**

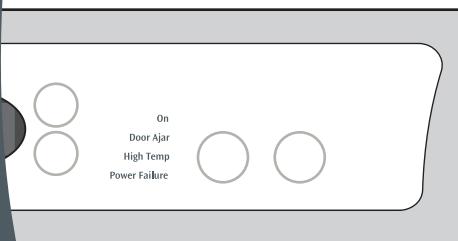

- 1 Detach the multi-wire cable connector located above the top hinge. Grasp both sides of the connector firmly and pull apart.
- 2 Remove top hinge cover screw on freezer door and remove cover. (some models)
- 3 Trace lightly around the door's top hinge with a pencil. This makes reinstallation easier.
- 4 Detach the water tube from the connector located below the freezer door. The connector releases when you press its outer sleeve inward.
- 5 Remove the screws from the top hinge and pull the multi-wire cable through it.
- 6 Lift the door off of the bottom hinge. Lay the door on its side to avoid damage to the
- Remove the three bottom hinge screws and hinge, if necessary.

To reinstall the refrigerator and freezer doors, reverse the above steps.

## TEMPERATURE CONTROLS

### NOTE

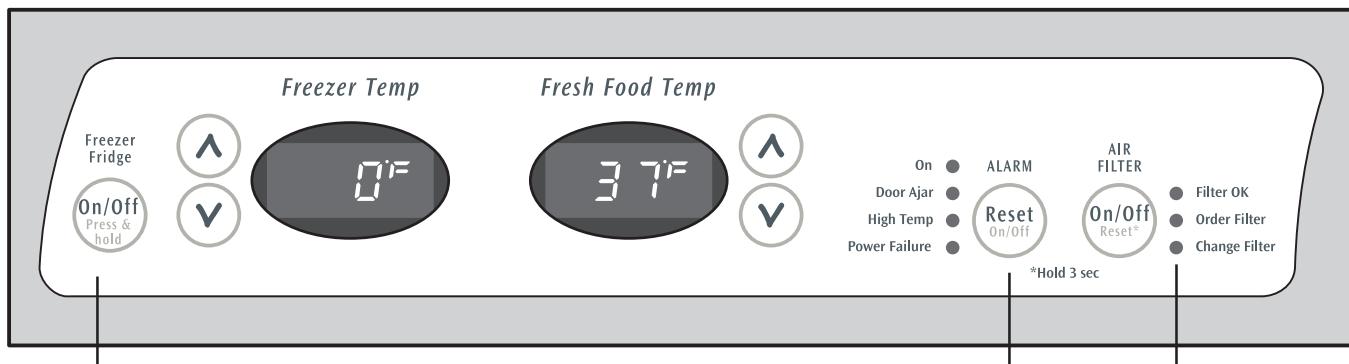

The advanced electronic system in your refrigerator requires additional diagnostic service procedures if rapidly recurring issues occur.

To operate with  
maximum efficiency,  
keep food inside.  
Clean the controls,

and the interior  
of the

## TEMPERATURE CONTROLS

Cooling System On/Off Button

Alarm Reset Button

Indicator Lights

### TURNING THE COOLING SYSTEM ON AND OFF

You can disable the cooling system in your refrigerator by pressing the **On/Off** button located on the left side of the temperature control panel. To ensure that you do not accidentally turn off the cooling system, the button does not work unless you press *and hold* it for three seconds. Once you disable the cooling system, all refrigeration to the freezer and fresh food compartments stops. To turn the cooling system back on, you must again press *and hold* the **On/Off** button for three more seconds.

#### NOTE

Pressing the **On/Off** button on the control panel disables your refrigerator's cooling system but does not disconnect power to lights and other electrical components. To turn off power to your refrigerator you must unplug the power cord from the wall outlet.

Each time you make settings on the control panel, a single audible tone acknowledges your input.

### SYSTEM MONITORING ALARMS (Select Models)

The electronic control system continuously monitors your refrigerator/freezer for temperature consistency, doors left ajar, and power failures. Variances from normal operating conditions are communicated by audible tones and a set of four status indicator lights.

### USING THE ALARM RESET BUTTON

You can disable or activate the alarm system by pressing *and holding* the **Alarm Reset** button for three seconds. Use it, for example, to turn off audible tones and/or flashing indicator lights.

Once you disable the alarm system, you must again press *and hold* the **Alarm Reset** button for three more seconds to reset (activate) the alarm system.

The **ALARM** indicator light remains off while the freezer and refrigerator compartments cool toward the current cooling settings. When temperature settings are reached, the **ALARM** light displays green to indicate an active alarm system.

### RESPONDING TO ALARMS (Audible Tones & Indicator Lights)

Your refrigerator's control system can convey the following information through audible tones and the alarm indicator lights.

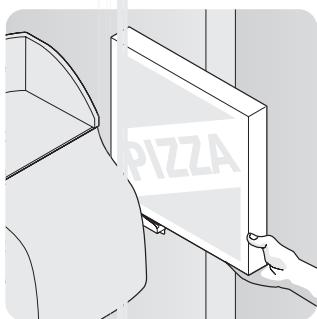

Alarm	Light	Tone	Condition	How To Respond
On	(light is off)		Alarm system is not active while freezer and refrigerator compartments are cooling toward the current temperature settings.	If freezer and refrigerator compartments do not match your temperature settings in three hours, expect the control system to signal other conditions. If cooling does not stabilize toward your current settings call for assistance, using the phone number on the back page of this <i>Use &amp; Care Guide</i> .
	Steady Green		Alarm system is active.	No response required.
Door Ajar	Flashing Green	✓	Freezer or refrigerator door has been open for over five minutes.	Close door to disable and reset alarm.
High Temp	Flashing Amber	✓	Freezer or refrigerator compartment has been too warm ( $7.2^{\circ}\text{ C}$ or higher) for over an hour.	Press <b>Alarm Reset</b> button to turn off alarm. If temperatures do not improve, call for assistance, using the phone number on the back page of this <i>Use &amp; Care Guide</i> .
Power Failure	Flashing Amber		A power outage was detected.	Press <b>Alarm Reset</b> button to turn off alarm and press again to reset. Check if the power failure lasted long enough to affect stored food temperatures.

## LOOKING INSIDE

### PIZZA SHELF (SOME MODELS)

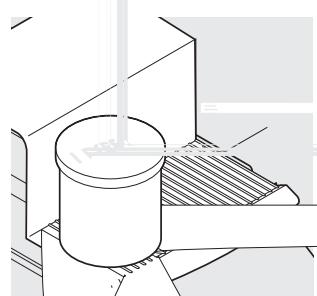

This shelf is attached to the freezer wall beside the ice dispenser container. This convenient area allows for storage of pizza and other tall items placed vertically between the ice dispenser container and the freezer wall.

Pizza Shelf

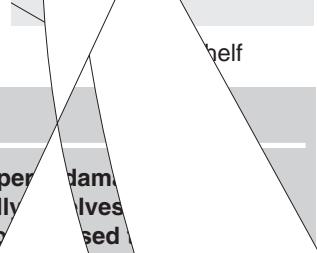

### ICE CREAM SHELF (SOME MODELS)

This shelf attaches to the top of the ice dispenser container. It allows storage of both round and rectangular cartons of your favorite ice cream.

### TIP-UP SHELF (SOME MODELS)

A Tip-Up shelf in the freezer section allows tall items to be easily stored.

### CAUTION

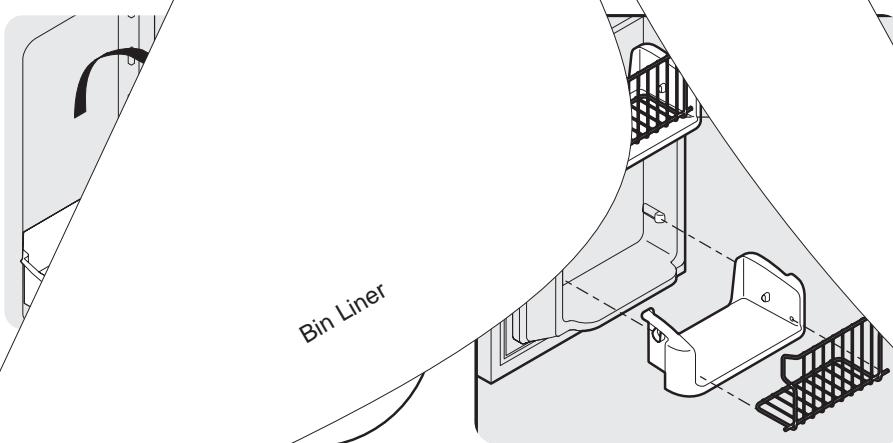

To avoid personal injury or property damage, tempered glass shelves carefully. Do not damage shelves suddenly if nicked, scratched, or exposed to rapid temperature change. See "Glass Cleaning Chart."

### ADJUSTABLE DOOR BINS

Some models have adjustable bins to suit individual needs.

#### To move door bins

1. Lift bin straight
2. Remove bin
3. Place bin in new position
4. Lower bin

House - SpillFree™

### CANTILEVER SHELF ADJUSTMENT

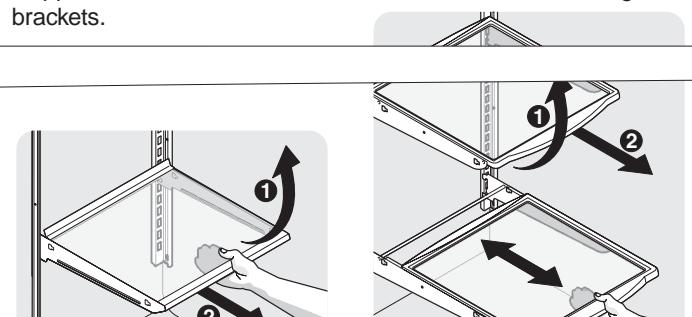

Refrigerator shelves are easily adjusted to suit individual needs. Before adjusting the shelves, remove all food. Cantilever shelves are supported at the back of the refrigerator.

#### To adjust cantilever shelves:

- 1 Lift front edge up.
- 2 Pull shelf out.

Replace the shelf by inserting the hooks at rear of the shelf into the wall bracket. Lower the shelf into the desired slots and lock into position.

\* *SpillSafe™* glass shelves (some models) catch and hold accidental spills. In some models, the \* *SpillSafe™* shelves slide out for easy access to food and for fast cleaning. The shelves slide out independently of their mounting brackets. Just pull the front or the shelf forward. Shelves can be extended as far as the stopper will allow but are not removable from their mounting brackets.

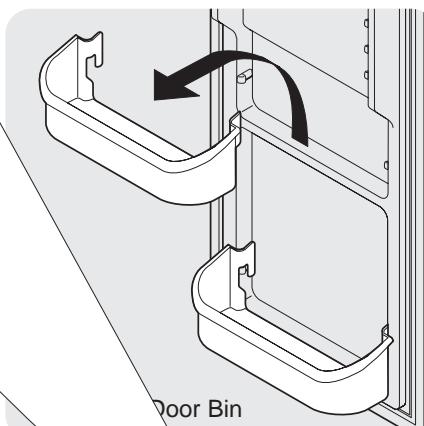

### DOOR STORAGE

Door bins and shelves are provided for convenient storage of eggs, bottles, and cans. Frequently used items can be quickly selected.

Some models have door bins that can accommodate gallon-size plastic drink containers and economy-sized jars and cans. Some bins are adjustable for maximum storage capacity.

The refrigerator compartment, which is warmer than the general food storage compartment, is intended for short term storage of cheese, butter, and other dairy products.

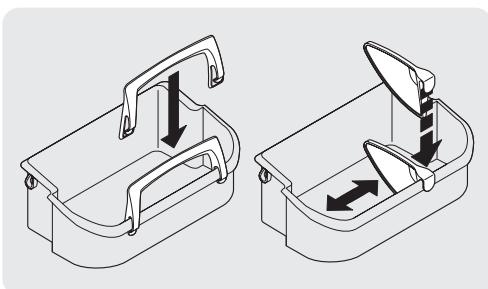

## LOOKING INSIDE (CONTINUED)

### TALL BOTTLE RETAINER (SOME MODELS)

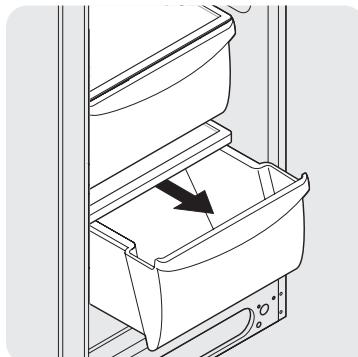

The Tall Bottle Retainer keeps tall containers in the bin from falling forward when opening or closing the refrigerator door. To install, hold the retainer at the top, and slide it over the outside wall of the bin, as shown in the diagram. The Tall Bottle Retainer works best with a Bin Snugger.

Tall Bottle Retainer (left) and Bin Snugger (right)

### CRISPERS

The crispers, located under the bottom refrigerator shelf, are designed for storing fruits, vegetables, and other fresh produce. Wash items in clear water and remove excess water before placing them in the crispers. Items with strong odors or high moisture content should be wrapped before storing.

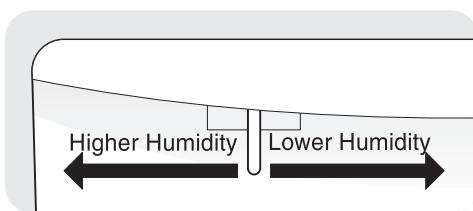

Crisper Drawer

### HUMIDITY CONTROL (SOME MODELS)

The Humidity Control, present on some models with crisper drawers, allows you to adjust the humidity within the crisper. This can extend the life of fresh vegetables that keep best in high humidity.

#### NOTE

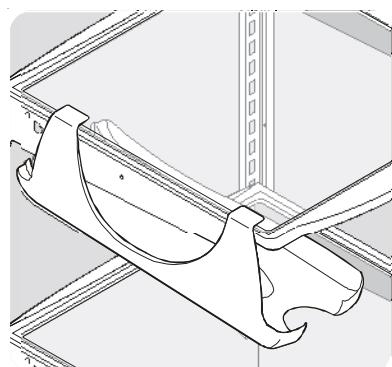

Leafy vegetables keep best when stored with the Humidity Control set on **Higher Humidity**, or in a drawer without a Humidity Control. This keeps incoming air to a minimum and maintains maximum moisture content.

Crisper Humidity Control

### SPECIAL ITEM RACK (SOME MODELS)

The innovative design of the Special Item Rack allows you to store a six-pack of 12 ounce drink cans, a bottle of wine, a two-liter soft drink bottle, or a carton of eggs. The Special Item Rack mounts on the left side of your refrigerator. To install, just slide the Special Item Rack onto any shelf as shown in the drawing.

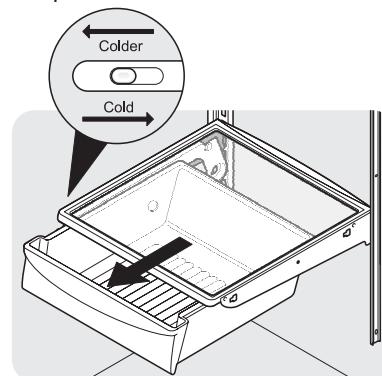

Special Item Rack

### DELI DRAWER (SOME MODELS)

Some models are equipped with a Deli Drawer for storage of luncheon meats, spreads, cheeses, and other deli items.

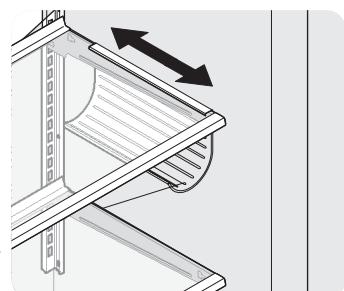

### MEAT KEEPER (SOME MODELS)

Some models are equipped with a Meat Keeper. Meat Keeper temperatures can be adjusted by sliding the Meat Keeper Temperature Control in either direction. Use this pan for short term storage of bulk meat items. If meats are to be kept longer than one or two days, they should be frozen. The Meat Keeper is fixed and cannot be moved up or down. If fruits or vegetables are to be stored in the Meat Keeper, set the Meat Keeper Temperature Control to a warmer setting to prevent freezing.

Meat Keeper with Temperature Control

Wine Rack

### WINE RACK (SOME MODELS)

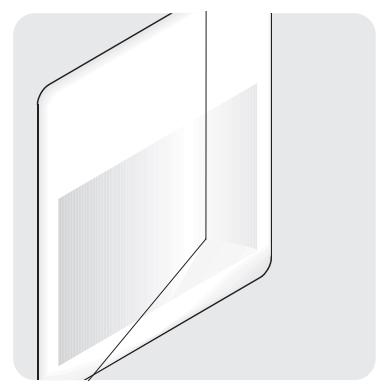

The wine rack stores bottles of wine, or single two-liter plastic bottles of juice or soda pop. To install, slide the Wine Rack onto the shelf with the curve facing in. To remove, slide the Wine Rack out. Install on either side of shelf.

ENSER

INSTALLING INSTRUCTIONS

## AUTOMATIC ICE AND WATER DISPENSER

Your refrigerator's water supply system includes several tubing lines, a water filter, a water valve and a water tank.

### **! CAUTION**

**For proper dispenser operation, recommended water supply pressure should fall between 30 psi and 100 psi. Excessive pressure may cause water filter to malfunction.**

- Begin filling the tank by pressing and holding a drinking glass against the water dispenser paddle.
- Keep the glass in this position until water comes out of the dispenser. There will be noticeable spurts and sputters as the system pushes air out through the system and dispenser nozzle. This is normal.
- Continue dispensing water for about 3 minutes to flush the system of any air and impurities. Empty glass as needed.

### **NOTE**

The water dispenser has a built-in device that shuts off the water flow after 3 minutes of continuous use. To reset this shutoff device, simply release the dispenser paddle.

### **! CAUTION**

**Chemicals from a malfunctioning softener can damage the ice maker. If the ice maker is connected to soft water, ensure that the softener is maintained and working properly.**

### **IMPORTANT**

Your ice maker is shipped from the factory with the wire signal arm in the ON position (side mounted) or with the switch turned ON (rear mounted). To ensure proper function of your ice maker, hook up water supply immediately or turn ice maker OFF by lifting the wire signal arm until it clicks and locks in the UP position (side mounted) or turn the On/Off switch to the Off (O) position. **If the ice maker is not turned off and the water supply is not connected, the water valve will make a loud chattering noise.**

The ice maker and container are located in the top of the freezer compartment. After the refrigerator is installed properly and has cooled for several hours, the ice maker can begin making ice within 24 hours. Air in new plumbing lines may

cause the ice maker to cycle two or three times before making a full tray of ice. With no usage, it will take approximately two days to fill the ice container.

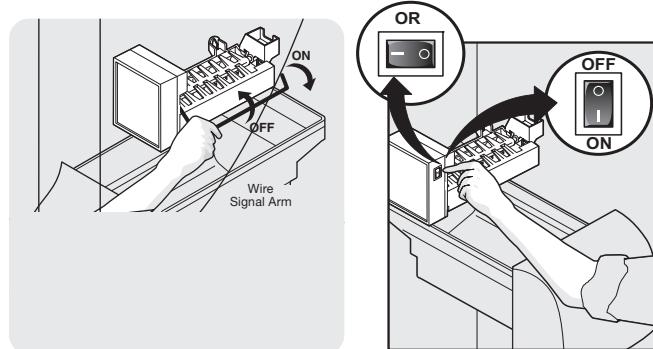

Because of new plumbing connections, the first production of ice cubes may be discolored or have an odd flavor. Discard ice made during the first 24 hours.

#### **SIDE MOUNTED**

To begin ice production, lower the wire signal arm to the DOWN or ON position. The ice maker turns off automatically when the ice container becomes full. To stop the ice maker, raise the wire signal arm until it clicks and locks in the UP or OFF position (see Figure 1).

#### **REAR MOUNTED**

Ice production is controlled by the ice maker's ON/OFF power switch. To gain access to the ice maker, pull the ice cream shelf out. Press the switch to the " " position to turn it Off and press it to the " " position to turn it On (see Figure 2). The ice maker also has a built-in wire signal arm, which automatically stops ice production when the ice bin is full. DO NOT use this signal arm to manually stop the ice maker.

## AUTOMATIC ICE AND WATER DISPENSER

A side mounted ice maker will produce 4 to 4.5 pounds of ice every 24 hours, depending on usage conditions. Ice is produced at a rate of 8 cubes every 75 to 90 minutes.

A rear mounted ice maker will produce 3 to 4 pounds of ice every 24 hours, depending on usage conditions. Ice is produced at a rate of 8 cubes every 75 to 90 minutes.

The ice and water dispenser conveniently dispenses chilled water, and ice cubes or crushed ice, depending on the model.

To operate the ice dispenser, select the ice option desired using the touchpad. Press a glass against the dispensing paddle as far up as possible to catch all ice. To stop dispensing ice, pull glass away from dispensing paddle. Do not remove the glass until the ice has completely dispensed. Complete instructions for the dispenser operation are attached to the inside of the freezer door (some models).

### **! CAUTION**

If the dispensing paddle is pushed for more than four minutes, the dispenser motor may overload and stop. The overload protector will reset automatically after three or four minutes.

- Ice cubes stored too long may develop an odd flavor. Empty the ice container and ensure that the ice maker is on (see previous page). The ice maker will then produce more ice.
- Occasionally shake the ice container to keep ice separated.
- If a large quantity of ice is needed at one time, it is best to remove cubes directly from the ice container.
- Stop the ice maker when cleaning the freezer and during vacations.
- If the ice maker will be turned off for a long period of time, turn the water supply valve to a closed position.

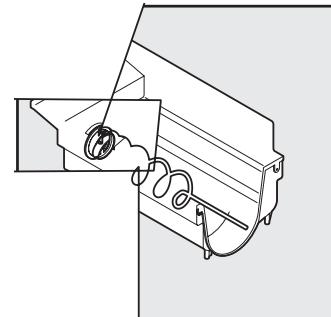

Clean the ice dispenser and ice container at regular intervals, particularly before you take a vacation or move, or if the ice dispenser sticks.

- Stop ice production on side-mounted ice maker by raising wire signal arm to the UP position. Stop ice production on rear-mounted ice makers by pressing the ice maker's On/Off power switch to the Off ( ) position.
- Remove ice container by lifting up and out. Empty and carefully clean the container with mild detergent. Rinse with clear water. Do not use harsh or abrasive cleaners. Allow ice container to dry completely before replacing in the freezer.

- Remove ice chips and clean the shelf and chute that supports the ice container.
- Replace the ice container. Resume ice production on side-mounted ice makers by lowering the wire signal arm to the DOWN position. Resume ice production on rear-mounted ice makers by pressing the ice maker's On/Off power switch to the On ( ) position.

### **! WARNING**

**Do not use the ice chute as a handle when removing or replacing the ice storage bin. Surfaces there may be sharp. Do not put fingers up ice chute. Surfaces there may be sharp.**

### **IMPORTANT**

When removing or replacing the ice bin, DO NOT rotate the auger in the ice bin. If the auger is accidentally rotated, you must realign the auger by turning it in 90° turns until the ice bin fits into place with the drive mechanism. **If the auger is not** properly aligned when replacing the ice bin, the refrigerator will only dispense *Crushed Ice*. The freezer door may also not close properly causing warm air to leak into the freezer.

### **! CAUTION**

**NEVER** use an ice pick or similar sharp instrument to break up the ice. This could damage the ice storage bin and dispenser mechanism.

## AUTOMATIC ICE AND WATER DISPENSER

### PURESOURCE™ \* ICE AND WATER FILTER (SOME MODELS)

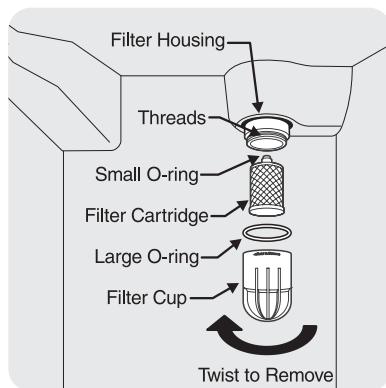

#### NOTE

If you purchased a refrigerator with a PureSource™ \* Ice and Water filter, please read the following use and care information. This ice and water filter system filters water to your ice maker and water dispenser. It is located in the upper right back corner of the refrigerator compartment.

#### System Startup:

Water supply does not need to be turned off, however, do not use ice and water dispenser while installing filter. The filter cartridge has already been installed in the filter housing at the factory. Refer to the *How to Prime the Water Supply System* section to properly fill the system with water.

Order new filter cartridges through the dealer where you bought the refrigerator, contact the *Electrolux Solutions Hotline* at 1-800-944-9044, or go to our web site at [www.frigidaire.com](http://www.frigidaire.com). It might be good to order some filter cartridges when you first install your refrigerator. Be sure to ask for the RG-100 PureSource™ replacement cartridge.

The PureSource™ \* NRG-2000 Ice and Water Filter System with the RG-100 cartridge is tested and certified by NSF International, the nationally recognized and respected, not for profit, certification organization for public health safety.

The PureSource™\* system is tested and certified to ANSI/NSF Standard 42. See performance data sheet for specifications. This system should not be used on water that is microbiologically unsafe or with water of unknown quality unless the water has been adequately disinfected before or after traveling through the filtration system.

- Rated Capacity - 400 gallons
- Rated service flow - .5 GPM
- Maximum Rated Pressure - 100 PSI
- Maximum Operating Temp. - 100° F

#### Changing the Filter:

Water conditions vary throughout the world, but changing the water filter every 6 - 9 months normally will ensure the highest possible water quality. **Ice jams in the ice maker and/or hollow ice cubes (partially frozen cubes with water inside), may also be a sign that your water filter needs changing.** The Filter Status light will turn red after 400 gallons of water has flowed through the ice and water dispenser. Also, if the filter has been in a refrigerator that has not been in use for awhile (during

\* White Westinghouse uses the name CrystalClear instead of PureSource, but they are the same filter.

moving for example), change the filter before reinstalling the refrigerator. The dispenser system will also operate without filtration (with filter cartridge removed).

#### To change filter:

It is not necessary to turn the water supply off to change the filter.

1. Open freezer door and leave open until filter change is complete.
2. Turn OFF side mounted ice maker by raising wire signal arm to the UP position. Turn OFF rear mounted ice maker by pressing ON/OFF power switch to the "O" position.
3. Hold filter cup firmly, and unscrew towards left (Some water could leak out as you remove cup. This is normal.). Filter cartridge should come down with cup. If cartridge remains in housing, pull down gently, while twisting filter back and forth.
4. Rinse out cup under running water.
5. The large o-ring that seals the filter system fits in the o-ring groove inside the cup. Should the o-ring fall out during filter cartridge replacement, simply place it back in the groove prior to screwing the cup back in place. If the o-ring becomes damaged, you will need to order one from the *Electrolux Solutions Hotline*.
6. Discard old filter cartridge.
7. Remove new filter cartridge from packaging. Place in cup. The end with the small o-ring should be up, out of the cup.
8. Screw cup, with filter, back onto housing. **Do Not Use Wrench**  
**To Reinstall Cup.** Filter cartridge will self-align as cup is tightened. Be sure cup is completely tightened with **PureSource™** logo facing outward. **Do Not Tighten Past Stop.**
9. Turn ON side mounted ice maker by lowering wire signal arm to the DOWN position. Turn ON rear mounted ice maker by pressing ON/OFF power switch to the "I" position.
10. Check for leaks. Open refrigerator door. Wipe any water droplets from the filter cup. Fill a glass with water. If there is a leak, unscrew filter cup, and reinsert the filter cartridge. Check placement of large O-ring. Reinstall filter cup, making certain it is tightened completely.
11. **To prime filter system and purge air from water line,** continue flushing the system for approximately 3 minutes to assure that the purest water possible is stored in the water tank. **There will be noticeable spurts and sputters as the system pushes air out through the system and out the dispenser nozzle. This is normal.**

#### IMPORTANT

##### Resetting The Filter Status Light (some models)

After replacing the filter cartridge, it will be necessary to press the *Filter Status* reset button located on the ice and water dispenser. This will reset the Filter Status light. Push the reset button until the green, red and amber lights flash (10-15 seconds). Please refer to the complete dispenser operating instructions attached to the inside of the freezer door.

**On models without a *Filter Status* reset button,** there is a set of Reminder Stickers included in the envelope that the Use & Care Manual came in. Choose a dated sticker that indicates 6 - 9 months (depending on your water quality and usage) from the date of installation. Place the sticker on the front of the filter cup to remind you when it is time to change the filter.

## AUTOMATIC ICE AND WATER DISPENSER

### PURESOURCE MB ICE AND WATER FRONT FILTER (SOME MODELS)

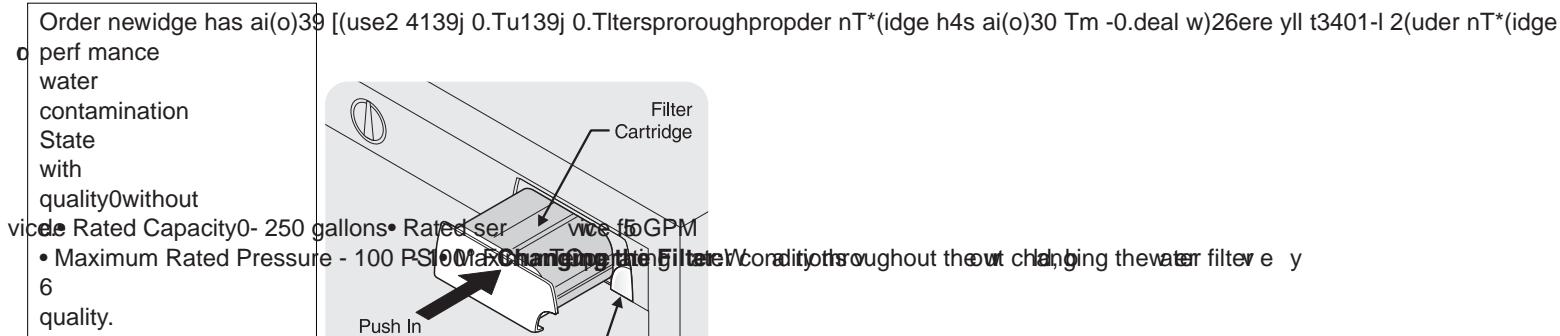

#### NOTE

If you purchased a refrigerator with a *PureSource MB* Ice and Water front filter, please read the following use and care information. This ice and water filter system filters water to your ice maker and water dispenser. It is located in the upper right front corner of the refrigerator compartment.

#### System Startup:

Water supply does not need to be turned off, however, do not use ice and water dispenser while installing filter.

The filter cartridge has already been installed in the filter housing at the factory. Refer to the *How To Prime The Water Supply System* section to properly fill the system with water.

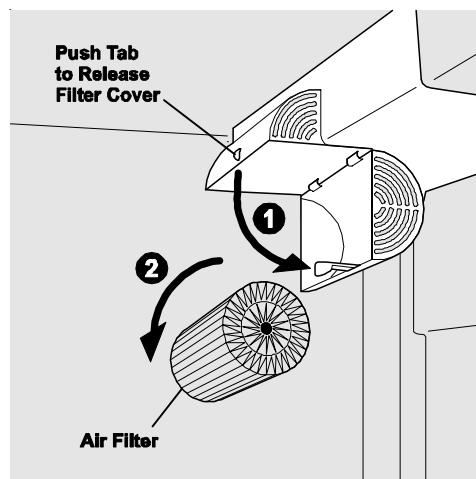

## REPLACING THE AIR FILTER

### Replacing The Air Filter

In general, you should change the air filter every six months to ensure optimal filtering of refrigerator odors. You may want to adjust this time period depending on the types and amounts of food you typically store in your refrigerator.

#### To replace your air filter:

- 1 Push the plastic bubble tab located on the side of the air filter housing. This releases the hinged bottom half to drop open.
- 2 Remove the old filter and discard it.
- 3 Unpackage the new filter and place it inside the hinged bottom half of the housing.
- 4 Push the hinged bottom half upward until the tab snaps into closed position.
- 5 Press and hold the **Filter Reset** button on the electronic control panel for 3 seconds. When the **Filter OK** light comes on, the status has been reset.
- 6 Press and hold the **Filter Reset** button for 3 seconds again to turn off the filter status system.

### IMPORTANT

The electronic control panel, located at the top of the refrigerator compartment, includes controls to monitor the status of your air filter, including indicator lights that remind you when to order the change the filter.

## FOOD STORAGE & ENERGY SAVING IDEAS

### FOOD STORAGE IDEAS

#### ***Fresh Food Storage***

- The fresh food compartment should be kept between 34° F and 40° F with an optimum temperature of 37° F.
- Avoid overcrowding the refrigerator shelves. This reduces the circulation of air around the food and results in uneven cooling.

#### ***Fruits and Vegetables***

- Storage in the crisper drawers traps moisture to help preserve the fruit and vegetable quality for longer time periods.

#### ***Meat***

- Raw meat and poultry should be wrapped securely so leakage and contamination of other foods or surfaces does not occur.

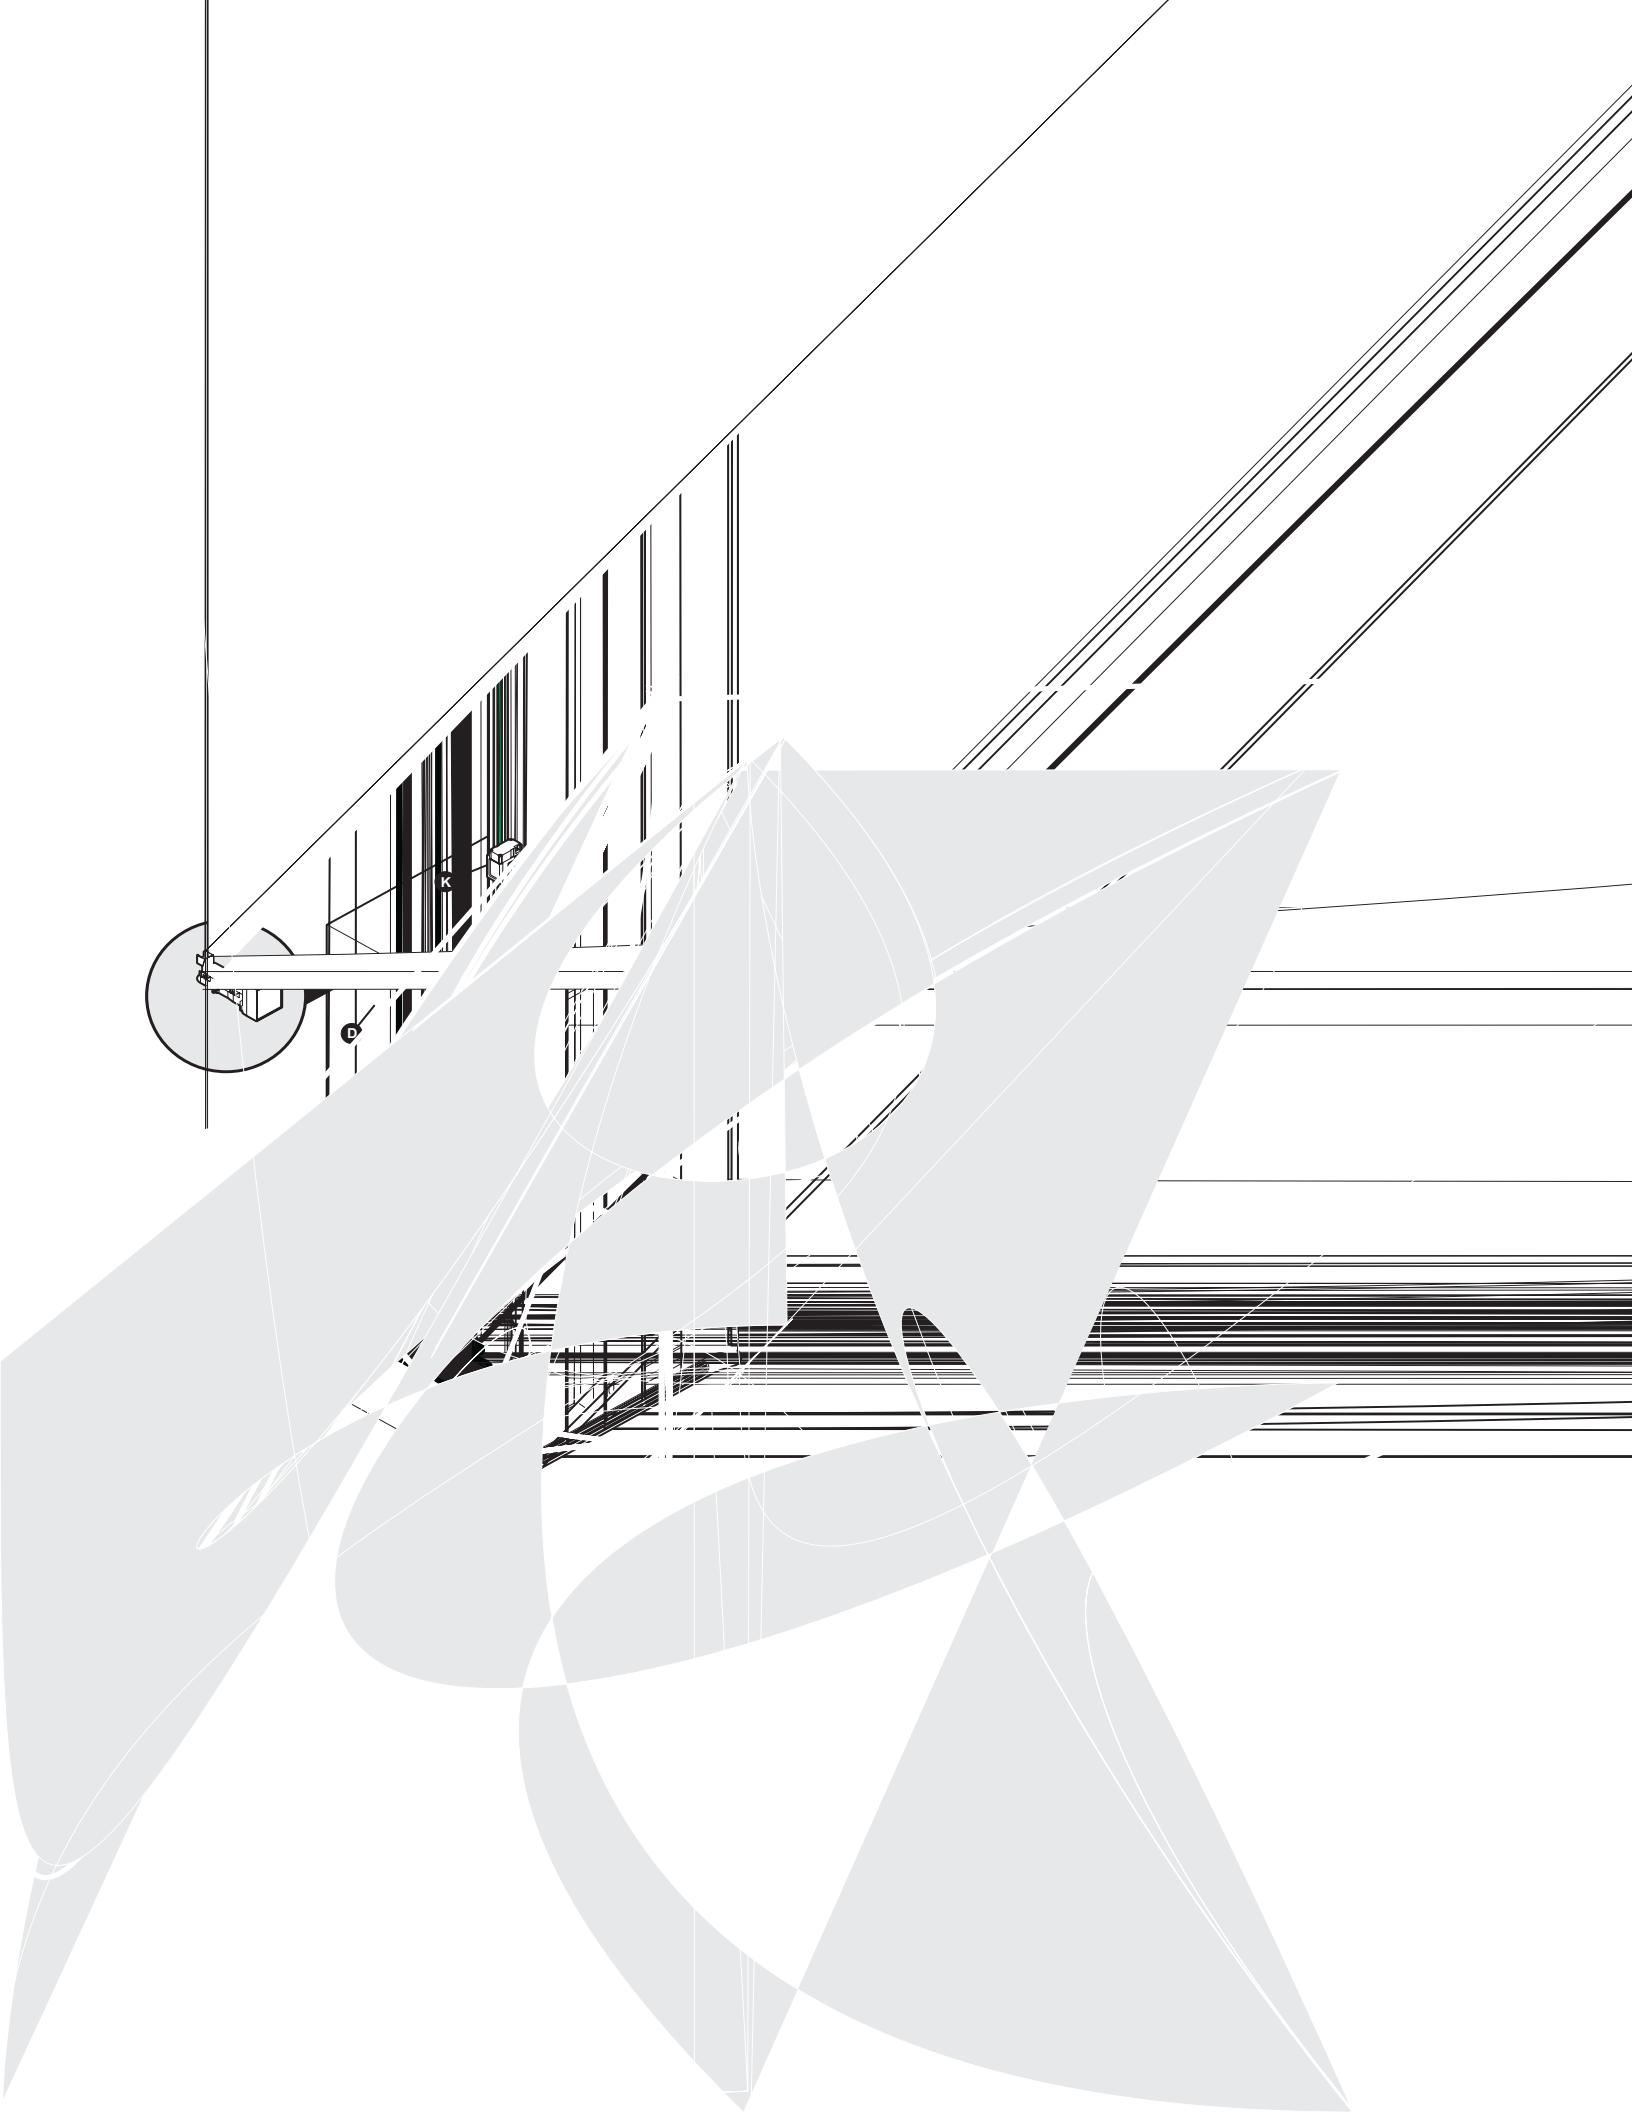

#### ***Frozen Food Storage***

- The freezer compartment should be kept at 0° F or lower.
- A freezer operates most efficiently when it is at least 2/3 full.

#### ***Packaging Foods for Freezing***

- To minimize dehydration and quality deterioration, use aluminum foil, freezer wrap, freezer bags or airtight containers. Force as much air out of the packages as possible and seal them tightly. Trapped air can cause food to dry out, change color, and develop an off-flavor (freezer burn).
- Wrap fresh meats and poultry with suitable freezer wrap prior to freezing.
- Do not refreeze meat that has completely thawed.

#### ***Loading the Freezer***

## CARE & CLEANING

Keep your refrigerator and freezer clean to prevent odor build-up. Wipe up any spills immediately and clean both sections at least twice a year. **Never** use metallic scouring pads, brushes, abrasive cleaners or strong alkaline solutions on any surface. **Do not** wash any removable parts in a dishwasher. **Always unplug the power cord from the electrical outlet before cleaning.**

### **! CAUTION**

- When moving the refrigerator, pull straight out. Do not shift the refrigerator from side to side as this may damage the floor. Be careful not to move the refrigerator beyond the plumbing connections.
- Damp objects stick to cold metal surfaces. Do not touch refrigerated surfaces with wet or damp hands.
- Never use CHLORIDE to clean stainless steel.

### **NOTE**

- The On/Off button on the Electronic Control only controls your refrigerator's cooling system. To turn off power to your refrigerator you must unplug the power cord from the electrical outlet.
- Do not use razor blades or other sharp instruments which can scratch the appliance surface when removing adhesive labels. Any glue left from tape or labels can be removed with a mixture of warm water and mild detergent, or, touch the glue residue with the sticky side of tape you have already removed. **Do not remove the serial plate.**

### **Care & Cleaning Chart**

Part	What To Use	Tips and Precautions
Interior/Door Liner	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Baking soda and water</li></ul>	Use 2 tablespoons of baking soda in 1 quart of warm water. <b>Be sure to wring excess water out of sponge or cloth before cleaning around controls, light bulb or any electrical part.</b>
Door Gaskets	<ul style="list-style-type: none"><li>• Soap and water</li></ul>	Wipe gaskets with a clean soft cloth.
Drawers/Bins	<ul style="list-style-type: none"><li>• Soap and water</li></ul>	Do not wash any removable items (bins, drawers, etc.) in dishwasher.
Glass Shelves	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Glass cleaner</li><li>• Mild liquid sprays</li></ul>	Allow glass to warm to room temperature before immersing in warm water.
Toe Grille	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Mild liquid sprays</li><li>• Vacuum attachment</li></ul>	Vacuum dust from front of toe grille. Remove toe grille. Vacuum backside and wipe with sudsy cloth or sponge. Rinse and dry.
Exterior and Handles	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Non Abrasive Glass Cleaner</li></ul>	Do not use commercial household cleaners, ammonia, or alcohol to clean handles. Use a soft cloth to clean smooth handles. <b>Do Not use a dry cloth to clean smooth doors.</b>
Exterior and Handles  (Stainless Steel Models Only)	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Ammonia</li><li>• Stainless Steel Cleaners</li></ul>	<p><b>CAUTION: Never use CHLORIDE to clean stainless steel.</b></p> <p>Clean stainless steel front and handles with soapy water and a dishcloth. Rinse with clean water and a soft cloth. Wipe stubborn spots with an ammonia-soaked paper towel, and rinse. Use a non-abrasive stainless steel cleaner. These cleaners can be purchased at most home improvement or major department stores. Always follow manufacturer's instructions.</p> <p><b>NOTE: Always clean, wipe and dry with the grain to prevent cross-grain scratching.</b> Wash the rest of the cabinet with warm water and mild liquid detergent. Rinse well, and wipe dry with a clean soft cloth.</p>
Exterior  (Easy Care Stainless Steel Models)	<ul style="list-style-type: none"><li>• Soap and water</li><li>• Mild liquid sprays</li></ul>	<p><b>CAUTION: DO NOT use abrasive or stainless steel cleaners on Easy Care Stainless Steel Models. It will remove the protective finish.</b></p> <p>Use warm soapy water to clean Easy Care surfaces. Mild liquid sprays may be used on stubborn spots.</p>

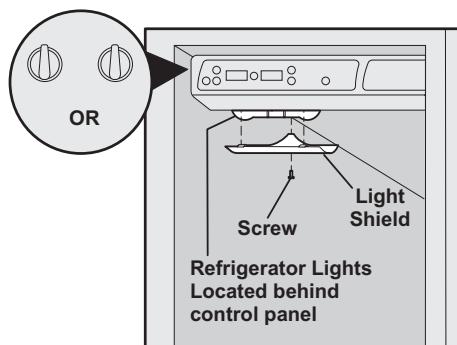

## CARE & CLEANING (CONTINUED)

### **CAUTION**

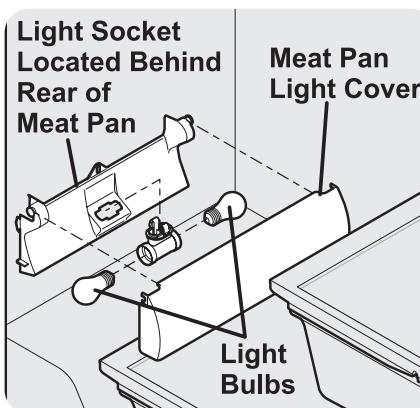

Wear gloves when replacing light bulbs to avoid getting cut.

### REPLACING LIGHT BULBS

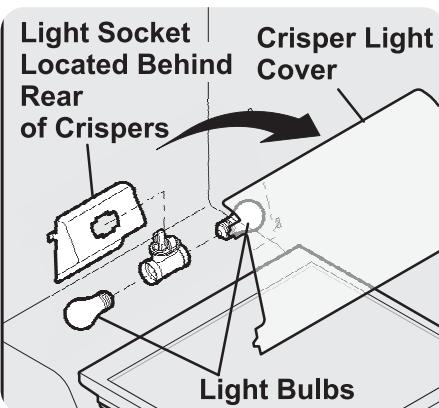

1. Unplug refrigerator.
2. Wear gloves as protection against possible broken glass.
3. Remove light cover, if necessary.
4. Unscrew and replace old bulb with an appliance bulb of the same wattage.
5. Replace light cover, if necessary.
6. Remember to plug the refrigerator back in.

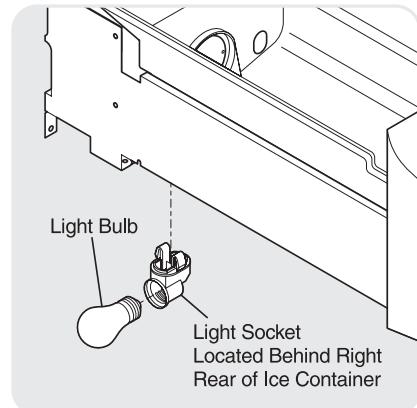

Refrigerator Light Replacement

or

Crisper Light Replacement (Models may vary)

Freezer Light Replacement

### Vacation and Moving Tips

<b>Short Vacations</b>	<ul style="list-style-type: none"><li>• Leave refrigerator operating during vacations of 3 weeks or less.</li><li>• Use all perishable items from refrigerator compartment.</li><li>• Turn automatic ice maker off and empty ice bucket, even if you will only be gone for a few days.</li></ul>
<b>Long Vacations</b>	<ul style="list-style-type: none"><li>• Remove all food and ice if you will be gone one month or more.</li><li>• Turn off automatic ice maker and turn water supply valve to closed position.</li><li>• Turning refrigerator controls to "OFF" by pressing and holding the <b>On/Off</b> button for 3 seconds (electronic) or turn control knobs to "0" (manual) on the mechanical controls only controls your refrigerator's cooling system. To turn off power to your refrigerator you must unplug the power cord from the wall outlet.</li><li>• Clean interior thoroughly.</li><li>• Leave both doors open to prevent odors and mold build-up. Block doors open if necessary.</li></ul>
<b>Moving</b>	<ul style="list-style-type: none"><li>• Remove all food and ice.</li><li>• If using handcart, load from side.</li><li>• Adjust rollers all the way up to protect them during sliding or moving.</li><li>• Pad cabinet to avoid scratching surface.</li></ul>

### **IMPORTANT**

If the refrigerator is going to be stored or moved in freezing temperatures, the water in the ice and water system must be drained completely. Failure to do so could result in water leaks when the refrigerator is put back into service. Contact a service representative to perform this operation.

# Major Appliance Warranty Information

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

**Exclusions    This warranty does not cover the following:**

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased "as-is" are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

**DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES**

CUSTOMER'S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. ELECTROLUX SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES, SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

<b>If You Need Service</b>	Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.
----------------------------	--

This warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
